

**Hurontario/Main Street Corridor Rapid Transit / Land Use / Urban Design
Feasibility Study - Class Environmental Assessment Master Plan
Notice of Study Commencement and First Public Information Centre**

THE STUDY:

The Hurontario/Main Street corridor is an important connection between Mississauga and Brampton. The purpose of this study is to conduct a comprehensive higher order transit (e.g. light rail transit, bus rapid transit), land use and urban design Feasibility/Master Plan study for the corridor from Port Credit in Mississauga to Brampton's downtown at Queen Street. The study will establish the framework for the future enhancement of the Hurontario/Main Street corridor.

THE PROCESS:

The environmental impact of this study is being assessed in accordance with the transit project assessment process under the *Environmental Assessment Act*. The project will satisfy the requirements for a Schedule C undertaking of the Master Plan process as described in the Municipal Class Environmental Assessment (EA) document (June 2000, as amended in 2007) prepared by the Municipal Engineers Association (MEA) and the supporting Codes of Practice issued by the Ministry of the Environment (MOE). The study will complete the first two phases of the Class EA process. A decision on whether to proceed to Phases 3 and 4 will be made at a later date with input from the public.

The map identifies the study boundary of the project.

PUBLIC INFORMATION CENTRES:

Public consultation will be a vital component of this study. The purpose of the first Public Information Centre (PIC) is to provide background information on the study and engage the public about problems and opportunities along the Hurontario/Main Street corridor. The first PIC is being held in Mississauga and Brampton on the following dates. The same information will be presented at each PIC.

Brampton
Tuesday June 24, 2008
City Hall
2 Wellington Street West

Mississauga
Wednesday June 25, 2008
Frank McKechnie Community Centre
310 Bristol Road East

5:00 – 9:00 p.m.
Presentation at 7:00 p.m.

COMMENTS INVITED:

We are interested in hearing any comments that you may have about this study. If you cannot attend and would like to provide comments or wish to be added to the Study mailing list, please forward your comments and contact information by June 27, 2008 to any of the project team members listed below. Further information is available by contacting:
